SUMMARY

Experienced Full Stack Developer with a strong frontend focus, skilled in building intuitive user interfaces and troubleshooting complex issues. Proven ability to deliver scalable solutions, whether building features from scratch or optimizing and debugging existing code, while collaborating across cross-functional teams.

SKILLS

Frontend: React.js, React Native, Next.js, JavaScript (ES5/ES6), TypeScript, CSS3, Tailwind, Material-UI, UX/UI

Backend: Node.js, PostgreSQL/MySQL, Firebase, Prisma ORM, Liquid

Blockchain: Smart Contract Integration, Web3 Wallet Integration, Ethereum, Nibiru (L1), Starknet (L2), ZK, FHE

WORK EXPERIENCE

Software Engineer, Front-End & dApp | Freelance | Remote | Feb 2024 - Present

- Develop full-stack applications, utilizing skills including React.js, React Native, Node.js, Next.js.
- 2nd place Award Winner, GMVietnam Rust Hackathon Jun 2024 - Nibiru Track for BiomeProject [🔗](#)
- 1st place Award Winner, EthSeoul 2024 Hackathon Mar 2024 - Fphenix Track or STinDer [🔗](#)

Software Engineer, Front-End, Happig, Inc. | SLC, U.S. | Mar 2024 - Apr 2025

- Developed and deployed responsive, high-performance apps using Next.js, React, TypeScript, and Tailwind CSS
- Built modular, reusable components and serverless API routes for scalable architecture
- Implemented seamless file handling and optimized media storage using Vercel Blob and deployment pipeline

Software Engineer, Full-Stack, Staytuned | New York, U.S. | Dec 2021 - Feb 2024

- Develop full-stack applications using Node.js, React.js, Python, integrating Shopify apps with Firebase and AWS RDS via Prisma ORM.
- Conduct timely Shopify API/object updates, and debug Shopify Apps using JavaScript, Python, and Liquid.
- Train Tech Support staff, manage workflow, foster interdepartmental communication, and provide mentorship.

Web Developer & Biz Dev Lead, Happig, Inc. | Fullerton, U.S. | Mar 2020 - Mar 2021

- Develop and launch Shopify website, establishing the company's online presence.
- Manage sourcing, purchasing, and inventory from South Korea.

PROJECTS

PoolSwap: KYC-Verified Liquidity Pool Exchange [🔗](#)

- Develop web app frontend using TypeScript, React.js, Next.js, Ethers.js, and integrate Solidity smart contracts.
- Utilize Uniswap V4 hooks and Worldcoin authentication to verify user identity, regulate liquidity pool usage, and ensure KYC compliance, encouraging institutional investment in DeFi.

BundleBuilder: DIY Product Bundle - Rebuild

- Execute re-build of full-stack application on Shopify using React.js, Node.js, Firebase, Liquid, Polairs, CSS, HTML.
- Restructure data from Firebase to AWS, utilizing Prisma ORM for efficient migration and optimization.

EDUCATION & LANGUAGES

LearningFuze: Full-Stack Web Development Program (760 Total hours committed)

University of California, Irvine: B.S., Biological Sciences

Languages (Proficiency): English (Native) | Korean (Native) | Spanish (Working Proficiency)
